

Top tips

Academic Search Ultimate database

Academic Search Ultimate is a **general purpose database** that contains scholarly literature from a variety of sources and disciplines. Because it covers a wide range of disciplines, it is a **very good resource for first-year students**, or a place to begin before switching to a discipline-specific database for greater depth.

To learn more and to access Academic Search Ultimate, please visit libguides.asu.edu/aspebscohost.

Getting started

You want to find peer-reviewed research articles on the topic of trauma-informed practices in schools. Prepare to search by **generating keywords** and breaking down your topic into the concepts you want in the search results.

For example:

Concept 1: **trauma-informed** is a type of practice.

Concept 2: **teaching** or **learning** or **classrooms** are places to apply trauma-informed practices.

A note about the power of **and, or** in searches:

Use **and** between your concepts to narrow search results to items with both concepts.

Use **or** between keywords to broaden the search to include related keywords for a single concept.

Tip 1 Searching

Enter keywords from your research topic. Use keywords that are central to your topic or argument. Academic Search Ultimate may also offer suggestions when you type in the search fields.

For example, if you are researching trauma-informed practices in education, you could enter the following **keywords**.

The screenshot shows the Academic Search Ultimate search interface. The search bar contains the text "trauma-informed". Below it, there are two rows of search filters. The first row has a dropdown menu set to "AND" and a search field containing "teaching or learning or classroom". The second row also has a dropdown menu set to "AND" and an empty search field. To the right of the search fields are buttons for "Select a Field (optional)", "Search", and "Clear ?". At the bottom, there are links for "Basic Search", "Advanced Search", and "Search History".

Tip 2 Limiting results

Sometimes **narrowing search results** is necessary to meet the needs of an assignment. Below are some of the limits you can use to narrow search results in Academic Search Ultimate; these can be found on the left-side filtering menu, next to your initial search results.

The "Limit To" filter menu includes options for "Full Text", "References Available", and "Peer Reviewed". It also features a date range selector with "From:" and "To:" fields, currently set to "2008" and "2023" respectively, with a "Publication Date" label. A "Show More" link is at the bottom.

The "Source Types" filter menu includes options for "All Results", "Academic Journals (319)", "Magazines (20)", "Newspapers (2)", and "Reviews (2)". A "Show More" link is at the bottom.

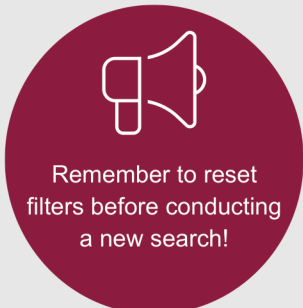

The "Publication" filter menu includes options for "children & youth services review (15)", "journal of social work education (12)", "journal of child & adolescent trauma (9)", "children & schools (7)", "journal of child & family studies (6)", and "journal of aggression, maltreatment & trauma (5)". A "Show More" link is at the bottom.

The "NAICS/Industry" filter menu includes options for "other individual and family services (65)", "offices of mental health practitioners (except physicians) (43)", "all other miscellaneous schools and instruction (33)", "administration of education programs (24)", "educational support services (21)", and "colleges, universities, and professional schools (20)".

The "Subject: Thesaurus Term" filter menu includes options for "wounds & injuries (43)", "interviewing (33)", "qualitative research (28)", "emotional trauma (26)", "social support (26)", and "thematic analysis (26)". A "Show More" link is at the bottom.

i Limiting search results will reduce the total number of results. If you had too few results in your initial search, you may want to try searching with different keywords.

The "Geography" filter menu includes options for "united states (13)", "australia (11)", "ireland (4)", "united kingdom (4)", "england (3)", and "california (2)". A "Show More" link is at the bottom.

Remember to reset filters before conducting a new search!

Tip 3

Evaluating results

First read the **abstract** to determine if the topic, variables studied or type of study meets your needs.

Use the **Title, Abstract and Subjects** to find additional keywords. Make note of them and try to use them as keywords in future searches to find more, and better, sources.

1. BECOMING A **TRAUMA-INFORMED** EDUCATIONAL COMMUNITY WITH UNDERSERVED STUDENTS OF COLOR: What Educators Need to Know.

By: Pemberton, Jennifer V.; Edeburn, Ellen K. Curriculum & Teaching Dialogue. 2021, Vol. 23 Issue 1/2, p181-196. 16p. Abstract: Disparate adult responses to student behavior, combined with increases in mental health issues and student **trauma**, compound the equity gap of racially minoritized students. Research suggests a correlation between social emotional **learning** (SEL) and student success (Gregory & Fergus, 2017). Providing a two-prong approach that includes (a) SEL curricular interventions that are not color-blind embedded within (b) a **trauma-informed** framework supports racially minoritized students' well-being while simultaneously addressing the equity gap within the (in-person and distance-**learning**) **classroom**. [ABSTRACT FROM AUTHOR] (AN: 153216665)

Subjects: SOCIAL emotional **learning**; MENTAL health of students; **EDUCATORS**; **CLASSROOMS**; PSYCHOLOGY of students; STUDENT well-being
